### **Mearns Academy**

## NATIONAL 4/5 Course Questions

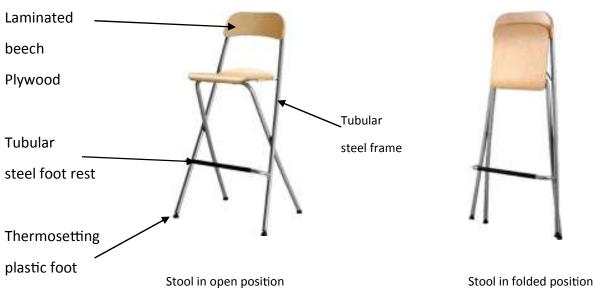

# DESIGN AND MANUFACTURE <u>DESIGN</u>

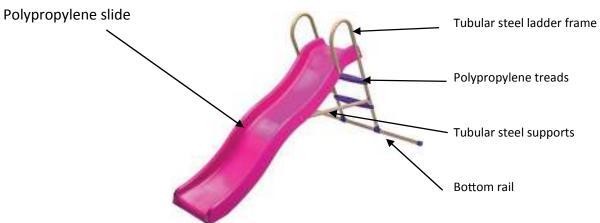

Ensure you read the question and observe the marks available, prior to answering questions i.e 4 marks at least 4 points noted.

#### 1. A folding kitchen stool is shown below.

- a) (i) State **two** reasons why tubular steel is a suitable material for the frame of the stool. 2 (ii) State a suitable manufacturing process for the thermosetting plastic feet and state a reason why this process is suitable. (iii) State **two** reasons why laminated beech plywood is a suitable material for 2 the seat and back of the stool. (iv) State a suitable method of permanently joining the steel foot rest to the frame **and** state a reason why this joining method is appropriate. 2 (b) Describe two ways in which the design of the stool has been influenced by each of the following ergonomic aspects: (i) anthropometrics; 2 (ii) physiology; 2 2 (iii) psychology.
- (c) State **two** reasons why each of the following is important in the design of the stool:
- (i) surface finishes;
  (ii) safety;
  2
- (iii) economics.

#### 2. A child's activity toy is shown below.

(a) (i) State <b>two</b> reasons why polypropylene is a suitable material for the slide.	2
(ii) State <b>two</b> reasons why steel tube is a suitable material for the frame of the	2
ladder.	
(iii) State a suitable finish for the frame of the ladder and state a reason why	2
this finish is appropriate.	2
(iv) State a suitable method of fixing the tubular steel supports to the	
polypropylene slide and state a reason why this fixing method is appropriate.	2
(b) Describe <b>two</b> ways in which the design of the activity toy shown above has been	
influenced by each of the following ergonomic aspects:	
(i) anthropometrics;	2
(ii) physiology;	2
(iii) psychology.	2

(c) Describe **two** ways in which the design of the activity toy shown above has been influenced by each of the following design issues:

(Note: different descriptions should be given for each design issue.)

(i) safety;

(ii) durability; 2 (iii) contrast.

2

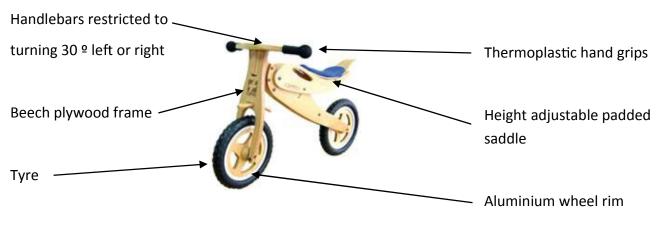

2

#### 3. A cordless vacuum cleaner is shown below.

(a) (i) State a suitable manufacturing process for the outer casing and justify 2 2 your answer. (ii) State **two** reasons why the designer may have produced models when designing this cordless vacuum cleaner. 2 (Note: different reasons should be given in your answers for (a)(iii) and (a)(iv).) (iii) State **two** reasons why polypropylene is a suitable material for the manufacture of the outer casing. 2 (iv) State **two** reasons why nylon is a suitable material for the bristles. (b) Describe **two** ways in which the design of the cordless vacuum cleaner shown above has been influenced by each of the following ergonomic aspects: (i) anthropometrics; 2 2 (ii) physiology; 2 (iii) psychology. (c) Describe **two** ways in which the design of the cordless vacuum cleaner shown above could have been influenced by each of the following design issues: (i) contrast; 2 (ii) consumer demand; 2 2 (iii) ease of maintenance.

**4.** A mass produced wooden training bicycle for a 2–4 year old child is shown below.

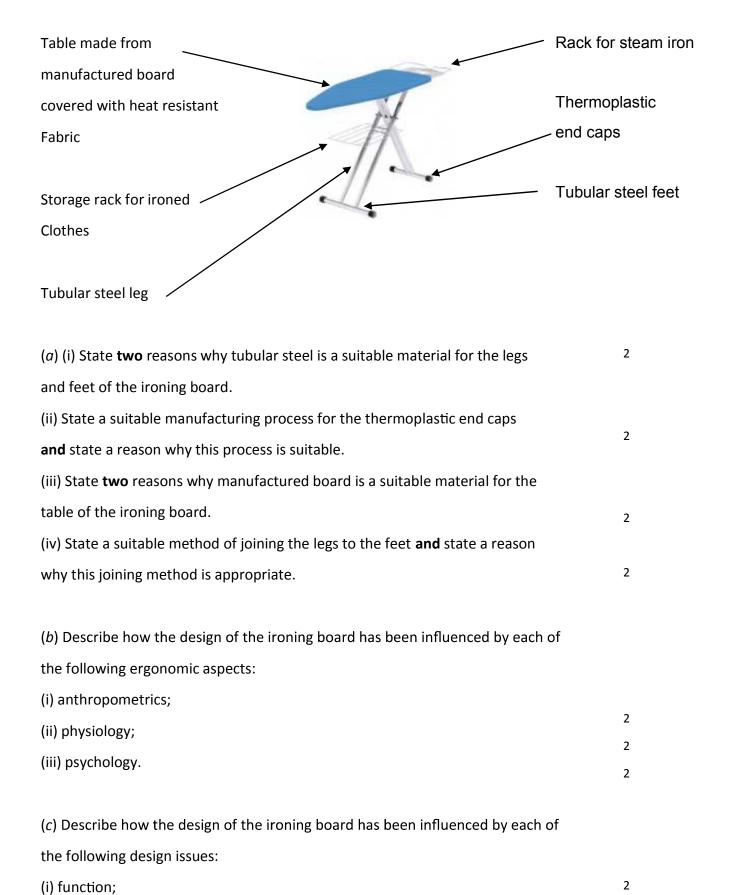

(a) (i) State a suitable material for the tyres and state a reason why this	2
material is suitable.	-
(ii) State <b>two</b> reasons why beech plywood is a suitable material for the	2
frame of the bicycle.	
(iii) State a suitable process for manufacturing the plywood parts of the	2
frame and state a reason why this process is suitable.	
(iv) State a suitable clear finish for the frame and state a reason why a clear	
finish would be applied.	2
(b) Describe <b>two</b> ways in which the design of the training bicycle shown above	
has been influenced by each of the following ergonomic aspects:	
(i) anthropometrics;	2
(ii) physiology;	2
(iii) psychology.	2
(c) Describe <b>two</b> ways in which the design of the training bicycle shown above	
has been influenced by each of the following design issues:	
(i) function;	2
(ii) safety;	2
(iii) contrast.	2
(Note: different descriptions should be given for each issue.)	
	(20)

#### 5. An ironing board is shown below.

(ii) safety;

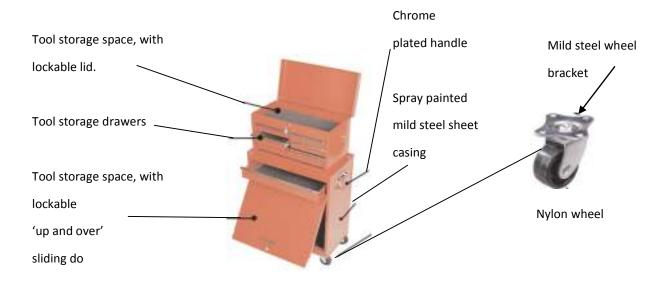

(iii) durability.

2

2

#### 6. A portable tool chest is shown below.

- (a) With reference to the items shown:
- (i) state **two** reasons why mild steel sheet is a suitable material for the manufacture of the tool chest;

2

(ii) other than painting, state **two** suitable protective finishes for the mild steel casing of the tool chest;

2

(iii) state any suitable manufacturing process for the nylon wheel;

1

(iv) state **two** reasons why nylon is a suitable material for the wheel;

2

(v) state **any** process used in the manufacture of the mild steel wheel Bracket.

1

- (b) Describe how the design of the tool chest has been influenced by each of the following:
- (i) anthropometrics;

2

(ii) physiology;

2

(iii) psychology.

2

- (c) Describe how the design of the tool chest could have been influenced by each of the following issues:
- (i) durability;

2

(ii) function;

2

(iii) safety.

2
